- OPTIONAL DESIGNER DECORATIVE BANDS AVAILABLE
- OPTIONAL OUTDOOR CANOPY TOPS AVAILABLE
- MANUFACTURED IN THE USA
- 2 TO 3 DAY SUPER QUICK SHIP for ALL MODELS
- DESIGNED AND PRODUCED FOR ENVIRONMENTAL SUSTAINABILITY

RECYCLEPRO III TRIPLE PURPOSE RECYCLING RECEPTACLES

RECYCLEPRO III provides 20" diameter receptacles designed to collect three types of recyclables or two types of recyclables plus waste in a single receptacle. This series includes a heavy gauge galvanized steel inner container with an aluminum bottom. Five different openings are available in five possible combinations to allow your facility to easily implement an instant recycling program with minimal space and cost.

Each opening has a separate poly bag below, supported by a special retainer system. Either 25%, 33% or 50% capacity is provided, as indicated on the product

information chart, depending on the particular opening and model. Each bag is designed to expand into more than its designated capacity as space allows. Similarly to the RecyclePro II design, there is no rigid metal divider between bags. This "smart RecyclePro" product has a high efficiency factor which means that receptacles can be serviced less frequently, saving time and money. More than one RecyclePro III unit may be used together or along side of single and/or dual purpose RecyclePro II units. Yes, they are all part of the same family and can be mixed and matched to your individual taste!

TRIPLE PURPOSE RECYCLEPRO™ RECYCLING RECEPTACLES 3
